

SIAM Journal on IMAGING SCIENCES

Mathematical and Computational Imaging Science

Editor-in-Chief
Michael Elad
Technion-Israel Institute of Technology

Covers all areas of imaging sciences, broadly interpreted. Manuscripts published in SIIMS include formal approaches, at the level of mathematics and/or computations, as well as state-of-the-art practical results. SIIMS provides a broad authoritative source for fundamental results in imaging sciences, with a unique combination of mathematics and applications. This all-electronic journal is mathematically and computationally based, and offers a unique forum to highlight the commonality of methodology, models, and algorithms among diverse application areas of imaging sciences.

SIIMS covers a broad range of areas, including but not limited to image formation, image processing, image analysis, computer graphics, computer vision, visualization, image understanding, pattern analysis, machine intelligence, remote sensing, geoscience, signal processing, medical and biomedical imaging, and seismic imaging.

SIIMS is published article by article at epubs.siam.org/siims

ISSN: 1936-4954

Frequency: electronically published continuously

Year established: 2008

Format: electronic (multimedia)

2019 volume number: 12

2019 rates: \$491
